Class 10th Maths - Chapter 3

This is Problem-4.1 from Exercise 3.2

1. Which of the following pairs of linear equations are Consistent/Inconsistent?if,consistent find the solutions graphically :

$$(i)x + y = 5 \quad (1)$$

$$2x + 2y = 10 \quad (2)$$

$$(3)$$

Solution:

Equations can also be written as:

$$\begin{pmatrix} 1 & 1 \\ 2 & 2 \end{pmatrix} \begin{pmatrix} x \\ y \end{pmatrix} \quad (4)$$

$$now, x = \frac{\begin{vmatrix} b & a2 \\ a1 & a2 \end{vmatrix}}{\begin{vmatrix} a1 & a2 \end{vmatrix}} = \frac{\begin{vmatrix} 5 & 1 \\ 10 & 2 \end{vmatrix}}{\begin{vmatrix} 1 & 2 \\ 1 & 2 \end{vmatrix}} = \frac{(5)(2) - (10)(1)}{(1)(2) - (1)(2)} = \frac{10 - 10}{2 - 2} = 0 \quad (5)$$

$$then, y = \frac{\begin{vmatrix} a1 & b \\ a1 & a2 \end{vmatrix}}{\begin{vmatrix} a1 & a2 \end{vmatrix}} = \frac{\begin{vmatrix} 1 & 5 \\ 10 & 2 \end{vmatrix}}{\begin{vmatrix} 1 & 2 \\ 1 & 2 \end{vmatrix}} = \frac{(5)(2) - (1)(10)}{0} = \frac{10 - 10}{0} = 0 \quad (6)$$

$$(7)$$

Therefore, x=y=0;it is a dependent equation
